

Hello,

You were invited by your friend to try out Skizzle and you have successfully decrypted the document, and are now reading it.

What is Skizzle? Skizzle helps you securely share encrypted files over email with others, with complete transparency of what is happening to your file, at every step. You can give access to anyone, and revoke access at any time.

How can you believe us? All the actions go through a blockchain and we cannot lie to you even if we wanted to.

We hope you enjoyed the experience of using skizzle. We have just launched it recently and would love to hear your thoughts.

PS: We are running a contest where \$600 worth of USDT is given away to 25 lucky winners. If you are interested in participating, please head over to www.skizzle.email/contest.

For any queries, you can reach us on hello@skizzle.email
